

We're BC Hydro and we have a big job to do.

Keeping the lights on for over 4 million people across the province takes a lot of talented people doing many different jobs. From working deep in a generating station, atop a power pole, or behind a desk, whatever it is that makes you tick we offer challenging careers to help you reach your potential.

We're investing more than \$2 billion per year in major capital infrastructure projects to help meet the growing demand for safe, reliable power. We're upgrading transmission lines, building new substations, and investing in our hydroelectric generation facilities. We aim to provide meaningful and challenging work, opportunities for growth and a healthy work/life balance. We've been recognized for excellence and been named one of B.C.'s Top Employers and one of Canada's Best Diversity Employers for four years in a row. It's our vision to be the most trusted, innovative utility company in North America by being smart about power in all we do

Director, Safety Strategy & Programs

Reporting directly to the Senior Vice President, Safety, the primary responsibility for the Director is developing and executing safety projects and programs in collaboration with the operations and capital infrastructure teams. The Director also works with business leadership to set safety strategy, policy, standards, metrics and targets for BC Hydro with direct safety program development, implementation and embedment efforts across the company. As an experience and innovative safety leader, you will coach and support your team to be accountable for successfully managing BC Hydro's safety programs and producing a safer culture and work place.

The Director, Safety Strategy & Programs requires the following experience and qualifications:

- 10+ years in a senior management in safety.
- A degree in Occupational Health & Safety or related field is preferred.
- Professional designation such as CRSP or CSP.
- Superior leadership, communications and consensus building skills.
- Proven track record of successful safety leadership, program development, and change management.
- Results and metrics focused.
- Broad knowledge of local government safety act, policies and regulation as it pertains to the utility industry.
